Office Action Summary	Application No. 10/660,518	Applicant(s) SUGIYAMA, AKIO	
	Examiner Huan Hoang	Art Unit 2818	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to because the "column decoder" in 3a, 3b, 3c and 3d should be "row decoder" as disclosed in the specification, page 10, lines 15-16.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency.

Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3, 4, 6-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3, 4, 6, 7, 8 each recite the limitation "this particular bank" (claim 3, page 27, lines 8-9, claim 4, page 28, lines 7-8, claim 6, page 30, lines 6-7, claim 7, page 31, lines 11-12 and claim 8, page 32, line 21). There is insufficient antecedent basis for this limitation in the claims.

Claim 8 recites the limitation "said determination means" (page 32, lines 20-21). There is insufficient antecedent basis for this limitation in the claim.

Claims 10, 11 and 12 depend on claims 4, 5 and 6 respectively. Claims 4, 5 and 6 recite some elements of the read means and claims 10, 11 and 12 also recite some elements of the read means. It is unclear that claims 10, 11 and 12 recite additional elements of the read means that have not been recited in claims 4, 5 and 6. For example, are the discharging transistor in claim 9 and the discharging means in claim 3 the same or different?

Allowable Subject Matter

4. Claims 1, 2 and 5 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art fails to teach or suggest the determination means for determining whether the output data that have been read are to be supplied as output to the outside in accordance with a determination start signal that is synchronized with a selection signal for the selection means.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Urakawa discloses a synchronous random access memory.

Chapel et al. discloses a virtual multi-port RAM.
